

# GARDENING MADE EASY *at Diacos*

**Personalise your garden space with ease. Nursery, garden supplies and café all at one easy location.**

Hello to everyone on the Peninsula. Some weeks have now passed since our opening and we have now settled in and have really enjoyed assisting in your gardens. For those that have had the opportunity to visit we hope that you enjoyed yourselves. We hope to make developing your garden even easier with the soon to be opening, Diacos Garden Supplies and then to follow the Diacos/Tully café, all in the one great location! Gardening with ease, that's the way it should be.

Sit and ponder how good your garden will look whilst enjoying a coffee and some cake. Display gardens will help provide inspiration. The café will provide the opportunity to relax and indulge while discussing your garden.

Having enjoyed your coffee and purchased your plants, let me remind you of the material components that will be found in Diacos Garden Supplies. Pardon the pun, but lets start from the ground up;

- Blended soils, potting mix, lawn mix, organic mulch
- Pebble range; cream river pebbles, natural charm pebbles, white ice, larger grey and brown tones.

To compliment those pebbles and plantings, create your own landscape with lovely sheets of pink granite and honey comb rock. Then to put the icing on the cake so to speak with our variety of mulches to lock in the moisture and make it easy for you by suppressing the weeds. Mulches include; red gum, pine bark, euca mulch, blackwood and organic mulch. And we have not forgotten the construction guys with washed sands, crushed rock and lillydale toppings.

Now as we approach Spring/Summer and things start to warm up, it is time to get going in the garden. You can finish those projects started last Summer and prepare your garden beds and get those desired plantings in. It is also a good time to find new plants and ways to cope with our changing climate. There is always a solution to what was thrown at us last Summer. For instance, we can do our fertilizing, add water crystals, find different mulches and even irrigate more cleverly.

Whilst thinking about your garden, don't forget to use your senses. Your garden is most enjoyable when you can smell beautiful fragrances, looks great by adding visual points of interest, sounds relaxing with the birds chirping happily due to bird attracting plantings. Above all, enjoy your garden by making it easy by coming to see us at Diacos, with café, nursery and garden supplies all at one easy location. - *Mario*

## Committed and Caring

Dental Care Mt Eliza was established by Dr Scott Robertson over 20 years ago. The practice moved to its current location at 126 Mt Eliza Way 5 years ago.

Dental Care Mt Eliza is a progressive and modern dental practice offering exceptional treatment using state of the art equipment and techniques in a relaxed, stylish and caring environment.

They are able to offer a wide range of services including Preventive General Dentistry, Orthodontics, Reconstructive, Restorative, Cosmetic, TMJ and Sleep Dentistry.

Dr Robertson is supported by a highly experienced team including Dr

Daniel Kaufman, Dr Jane Snell, Oral Hygiene Therapist Michael Popp and Hygienist Katz Naicker.

The approach of the entire Dental Care at Mt Eliza Team is to offer honest, responsible, helpful service and advice to the entire patient base.

"We listen carefully to your concerns and are committed to full and open two way communication in a caring and non-judgemental environment" says Dr Robertson.

Appointments are available Monday to Fridays from 8am and their appointment schedule has daily urgent care times available for unforeseen dental emergencies.

## Ask the DENTIST?

Q.

**WHAT DO YOU LOOK FOR IN YOUR OWN DENTIST?**

A.

**THE ABILITY TO UNDERSTAND AND COMMUNICATE.**

Many people ask around and simply go to a dentist that a friend recommends. Personally, I look for more than a recommendation, I look for a dentist who can communicate with me and with whom I feel comfortable.

I want my dentist to be willing to take the time to listen to what I want to achieve, understand my situation and be able to explain the different options. Then to help me work out the solution that's right for me.

For me, it's also about finding someone who looks beyond the first problem – say a broken filling – and takes a longer term view of my dental health. Then explains it to me so that I can make informed choices, based on their professional experience and advice. Yes, I ask my dentist questions – so please don't be shy about asking us.

*Dr. Scott Robertson*
