

FACELIFTING *without a Face Lift!*

Facelift Does Not Necessarily Require Surgery

Kas Hollingsworth our Registered nurse who performs all of Mr Brown's injectable treatments, has undergone further extensive training and can help you camouflage the aging process using wrinkle eraser injections as well as dermal filler injections.

This can help create the illusion of youth and maybe put off the inevitable option of surgical facelift for a few more years to come.

Consultations with Kas are complimentary and she will assess you as well as point out relevant costs before proceeding.

Joanne Lonergan patient Educator for twelve years works between both the Frankston Private and Berwick Private rooms. She offers complimentary consultations regarding cosmetic Plastic surgery and has some after hours appointments available. She will explain procedure,

and show you photographs of expected outcomes. There is never any pressure to book appointments or surgery. This decision is one that we all as a practice feel should be taken seriously and not with pressure.

What Can We Do?

Wrinkle erasers remove unwanted wrinkles and skin creases with the use of tiny muscle-relaxing injections

The injections prevent selected muscles from repeatedly contracting, thereby creating wrinkles.

Maintenance is the key and will prevent future wrinkles and prevent the look of aging. Injectable wrinkle erasers are a popular non-surgical injection that

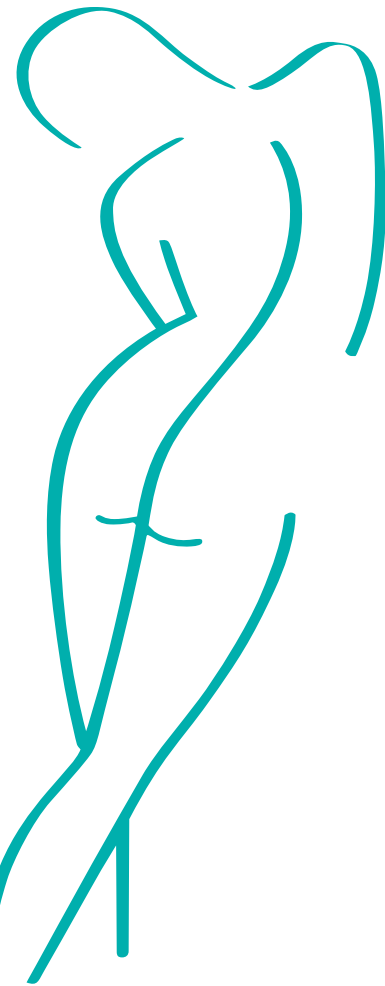

temporarily reduces or eliminates frown lines, forehead creases, crows feet near the eyes and thick bands in the neck.

These products can also be used to re-shape the brow and position of the eyebrows.

Chemical peels are a non-surgical technique used to improve the appearance of the skin. In this treatment, a chemical solution is applied to the skin, to remove the most superficial layer of dead cells and allow the smooth, healthy underlying skin to appear. The new, regenerated skin is usually smoother and less wrinkled than the old skin.

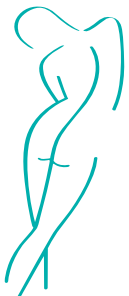

Dermal Injectable Fillers will transform fine-lines or deep creases, furrows, wrinkles, scars or other skin depressions allowing a more natural and refreshed look.

They can give enhanced shape and definition to lips and lines around the mouth and remove, fill-in or plump up deep lines, wrinkles, depressions, scars and creases around the mouth, chin, cheeks, forehead and eyes.

"KAS IS BACK"
